

Statement and Expression

A line or Unit of code that perform action is called statement

```
var Name = "Owais"; //This is called a statement  
console.log(Name); // This is also a statement
```

Expressions can be made up of one or more operands, which are values or variables, and one or more operators, which perform some operation on the operands.

```
let x = 10;  
let y = 5;  
x + y; //This is an Expression
```

```
let firstName = "Owais";  
let lastName = "Ashraf";  
let fullName = firstName + " " + lastName; // This is an expression
```
